

Van Way Prop, LLC.

Business Manual

Our Vision:

One day, all communities in this nation and around the World will have access to chip Wind power.

Our Mission:

We work hard every day to make our business the world's most recognizable Prop brand.

Our Values:

Loyalty and respect to all our interested and even not-interested parties.

Our History:

Bruno Van Way founded the company in 1753 when there were even no winds at all, or they just started to be noticed. With his brilliant vision of high winds coming soon upon us, he began with a single product: Breeze Prop. This model revolutionized the industry through its unbelievably chip cost and virtually no noise at all in operation! Our innovative advertising programs such as the now-celebrated Prop-in-the-Head commercials with a regular baseball cap and a Prop mounted on the top to cool down earsplitting enthusiasm of users. Over time a greatly expanded line of products was developed around the first Prop to deliver super-duper chip power to households and farms of all kinds. We even started powering radios in Sesame county to play Beethoven to caws to be happy and to produce more milk.

Despite its early success, in the mid-80's the company began shifting its product line focus into the Nose-Free Prop configurations to satisfy ever-growing market demand around the world. Now, nearly three hundred years later, the Prop brand is the nationally and internationally known standard for High Wind Power. Recently the company started focusing on getting rid of wastes of all kinds.

The organization has transitioned to the Lean Props, design, manufacturing, business management system, and everything else: very-very lean.

Jokes aside, the following sections comply with the requirements of ISO 9001 2015.

Our Quality Policy:

- Management Review establishes and reviews our quality and business objectives;
- We maintain a business management system complaint with the requirements of the Applicable Standards and Regulations;
- We promote the culture of continual improvement of the business and quality management systems;
- This Policy is appropriate to the purpose and context of the organization and supports our strategic direction.
- Our Quality Policy is available to all interested parties

Management System Scope:

Design, manufacture and service of High Wind Props for wind power industry.

Exclusion and non-applicable elements:

- No exclusions – we design products;
- No non-applicable requirements – we comply with all the requirements of the standard.
